

Jason Wong

[jaasonw](#) | [in wayson](#) | [jaasonw.github.io](#) | [wayson@csu.fullerton.edu](#)

Education

California State University, Fullerton

August 2020 - Present

- **Degree:** Computer Science, B.S. (Expected 2022)
- **Coursework:** Databases

Pasadena City College

August 2017 - June 2020

- **Degree:** Mathematics, AS-T
- **Coursework:** Computer Organization, Unix Scripting, Discrete Mathematics, Data Structures

Skills

Languages: C++, Python, Java, JavaScript/TypeScript, HTML/CSS, \LaTeX , Dart, x86 Assembly

Libraries/Frameworks: Bootstrap, Flask, Node.js, Flutter

Tools/Software: git, Unix/Linux, AWS, Google Cloud Platform (Firebase)

Work Experience

Nex-ii LLC, Twiine Full Stack Developer, twiine.com

June 2020 - September 2020

- Built a hangouts planning and user profile page with support for realtime updates from the database
- Developed the backend login and signup flow with support for Google, Facebook, and Email authentication
- Designed and implemented the API allowing users to schedule hangouts and send invitations to other users
- Optimized the database to minimize the number of queries for Firebase's per document read billing
- Used Flutter to build the mobile app and Node.js + Python on Firebase to build the backend

PCC Learning Assistance Center Computer Science Learning Assistant

January 2019 - December 2020

- Worked one-on-one with students to teach computer science concepts and debugging techniques
- Worked with professors to help improve lectures and build long term study habits within students
- Provided assistance to students with software issues in classrooms and computer labs
- Assisted and advised staff and administrators on the transition to remote tutoring during the COVID-19 Pandemic

Projects

Spotify Seasonal Playlist Sorter Developer

April 2020

- Worked in a team to develop a web app that places liked songs on Spotify into playlists grouped by seasons
- Developed and designed the frontend and deployed the app onto an AWS EC2 instance
- Used Python with Flask and the Spotify REST API

SQL Relational Database System Developer

June 2019

- Developed a relational database management system in C++ that supports a subset of SQL commands
- Implemented a B+Tree to index database entries for fast querying
- Implemented an SQL command parser

Sushi Shop Developer

May 2017

- Led a team to develop a sushi making game in Java
- Developed a game where the player is given a randomized sushi order and must move a plate to catch falling ingredients to construct the order

Leadership

She.Codes Webmaster, Treasurer

September 2019 - June 2020

- A club at PCC that aims to create a community for women in the tech industry
- Wrote and sent weekly newsletters to club members
- Hosted a workshop introducing members to the basics of git and version control
- Designed and maintained the club website
